

**YOUR PARTNER IN THE MANUFACTURING INDUSTRY
SINCE 1989**

INTRODUCTION OF WALDEC GROUP

Waldec Group is a leading supplier of machines, tools, spare-parts and consumables to the metal, rubber, plastic and polyurethane industries. Thousands of companies benefit from our local salespeople in all the Nordic and Baltic countries. Our own technical service teams certified by our suppliers provide installation, training, support and maintenance.

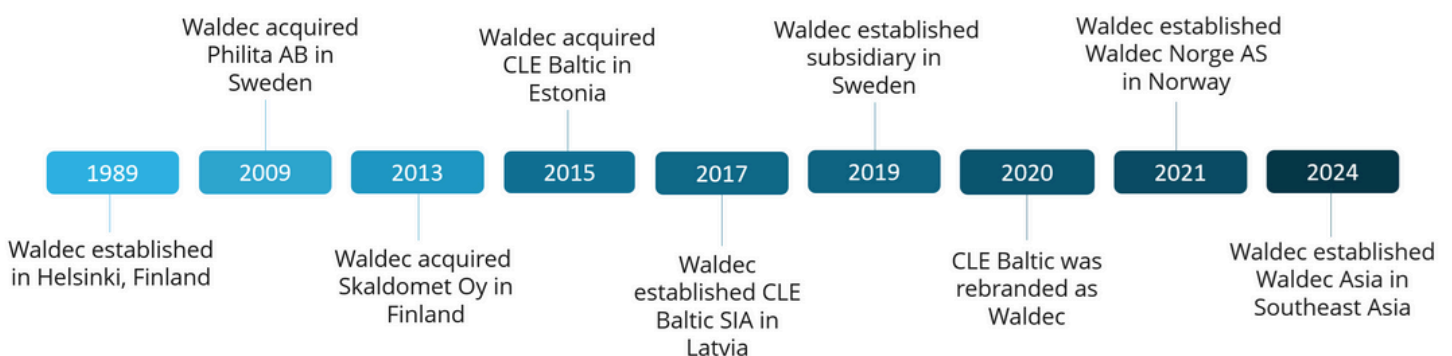

We are committed to meet all your manufacturing needs

Firstly, we provide a large variety of high-standard machines for metal and polymer industries – from sheet metal bending tools to laboratory equipment for polymers.

Secondly, we are a leading supplier of polymer materials, such as elastomers, stop-off paints and colours. In addition, we have a wide selection of industrial hardware products.

Thirdly, we offer industry-leading tools for heat treatment and filtration, mould and magnetic solutions, press and riveting tools and more.

And finally, our services include, but are not limited to installations, maintenance and customized solutions. Benefit from our training and lifetime services – we are here to support you!

YOUR PARTNER IN THE MANUFACTURING INDUSTRY

We are a leading supplier in Northern Europe, operating across the Nordics and Baltics through our network of local regional offices. Our suppliers and principals are strategically sourced from across the globe.

Our core strength lies in delivering superior quality solutions tailored to our customers' needs, combined with the ability to communicate seamlessly in their language.

This enables us to identify the most suitable suppliers and principals for our customers' production requirements, acting as a vital bridge and facilitator between clients and suppliers.

Waldec ASIA is the latest addition to the Waldec Group of companies. With a strong focus on representing carefully selected suppliers in Thailand, Malaysia, and Laos, we specialize in providing high-quality equipment and expert technical maintenance throughout Southeast Asia.

MATE PRECISION TECHNOLOGIES

Mate manufactures workholding, tooling for every major CNC punch press with a 100% satisfaction guarantee.

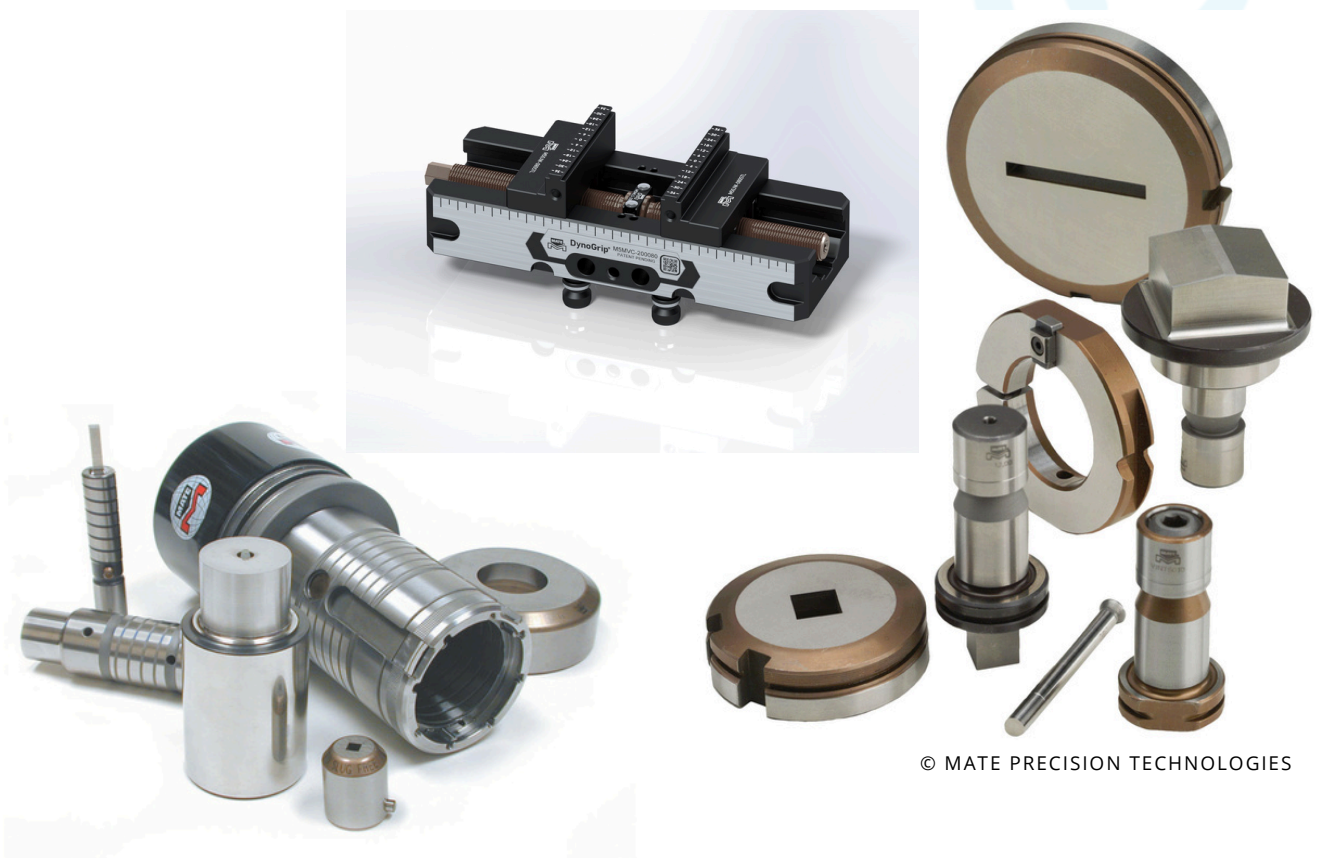

Mate is a world-class manufacturer of superior solutions for the metalworking industry. From unique building façades thought to be impossible to make, to a new way to add strength to thin material.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA

SAFANDARLEY B.V.

SafanDarley is the leading global specialist in developing and constructing press brakes and shears for both thin and thick sheet metal.

SafanDarley use the most high-quality equipment and systems in a streamlined process with strict quality control. In doing so they apply the principles of 'lean manufacturing' to produce as flexibly as possible with minimum wastage. This way they combine the best possible quality/price ratio with socially responsible entrepreneurship.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.SAFANDARLEY.COM

HYDRAULIC PRESS BRAKES

- Easy control using Touching-controls
- Wide range modular backgauge

SHEARS

- Very energy efficient and low-noise, and uses only a fraction of the usual amount of oil

ELECTRONIC PRESS BRAKES

- Up to 30% shorter cycle times
- Servo-electronic bending with an E for even bending
- Incredibly stable backgauge with CNCdriven X and R axes

© SAFANDARLEY B.V.

For over 85 years, WILA has developed and manufactured high-end press brake clamping systems and tools for press brake manufacturers and users. It has gradually grown from a blacksmith shop into a specialized, professional and high-tech company.

BALTEC AG

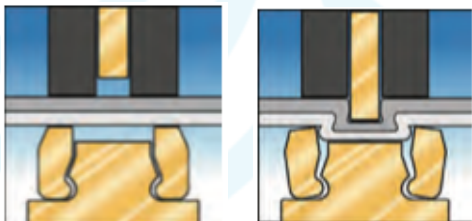

© baltec.com

BalTec offers high quality riveting units and machines. They specialise in radial and orbital riveting, press equipment, and automated assembly equipment. They manufacture work cells which include riveting machines and press systems.

The high-quality riveting machines include radial riveting, orbital riveting, SmartLine, Ecoline, fitting machine, process controller and quality monitoring. The press systems include manual toggle presses, pneumatic aided presses and hydro- pneumatic presses. BalTec can offer a solution for virtually any cold forming, fastening or assembly application in automated assembly equipment.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.BALTEC.COM

BTM SCANDINAVIA AB

© BTM SCANDINAVIA AB

BTM Scandinavia aims to help people realize the benefits of clinching. With their patented Tog-L-Loc sheet metal joining system you do not need to worry about fasteners, sparks or fumes. Whether you are joining plain, painted, or coated sheet metal parts, with Tog-L-Loc clinching has never been as technically efficient and environmentally friendly. They make sheet metal joining and clinching simple.

Tog-L-Loc forms a strong interlocking joint within the metals themselves. Fast, economical, and consistent, Tog-L-Loc is used worldwide in the manufacturing of automobiles, appliances, and other products. From simple tooling to high-speed automation, the company provides solutions to your manufacturing requirements.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.BTMSCAND.SE

Boschert is a producer of notching and punching machine programs and is well-known to every sheet-metal working company.

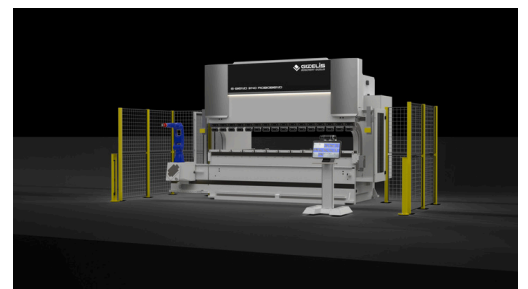

Their machinery line up includes punching and notching machines. Boschert has also a product range of machines with a series of press brakes and shears. This line was born through the need of providing the customers a full solution concerning the sheet metal processing machinery.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.BOSCHERT.DE

Gizelis offers The RoboBend option, a system which can be mounted in any of Gizelis' hydraulic Press Brakes. Press Brake is capable to operate as a Robotic Bending cell when it is needed or as a manual Press Brake with an operator with all safety systems integrated, creating a hybrid system.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.GIZELIS.COM

© BOSCHERT GIZELIS.CO

CF LAMIERE S.A.S (SLAT EASY CLEANER)

© CF LAMIERE

Slat cleaner for fiber lasers and CO2 lasers. It easily removes the slag, also eliminating any oxidized residues and preventing contamination on stainless steels.

Its system of wheels the slats maintain their characteristics unchanged over time and the cleaning procedure is fast and safe.

Thanks to a combination of special cutters, powerful motor with electronic rotation control, combined with integrated pneumatic traction, Slat easy cleaner is the fastest in cleaning the laser benches, without any effort. The machine pulls itself.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.SLATEASYCLEANER.COM

METALIX CAD/CAM LTD

cncKad

A fully integrated solution for cutting and punching

AutoNest

Automatic nesting of true shapes

MBend

Programming and simulating CNC press brakes

MRobot

Programming and simulating robotized bending cells

MTube

3D import and 3D tube design

@METALIX

Metalix specializes in the development of advanced CAD/CAM solutions for the sheet metal industry.

Metalix software has a reputation for excellence. Driven by a thorough understanding of technology constraints, their solutions optimize material usage and production time.

The company maintains its status as a market leader by adjusting its products to the latest advancements in the field of sheet metal processing.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.METALIX.NET

ECLIPSE MAGNETICS LTD

Eclipse Magnetics has invented the now world famous "Red" range of magnets and pot magnets already in the late 1940's. Since then the range has extended to include a large variety of magnetic tools.

Their magnetic technology is applied in numerous sectors including Automotive Manufacturing, Aerospace, Food Processing, Precision Engineering, Pharmaceutical Processing, Oil & Gas, Steel and OEM Automation projects. Magnetic technology can improve your business by reducing costs, increasing operational efficiency and improving safety.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.ECLIPSEMAGNETICS.COM

© ECLIPSE MAGNETICS

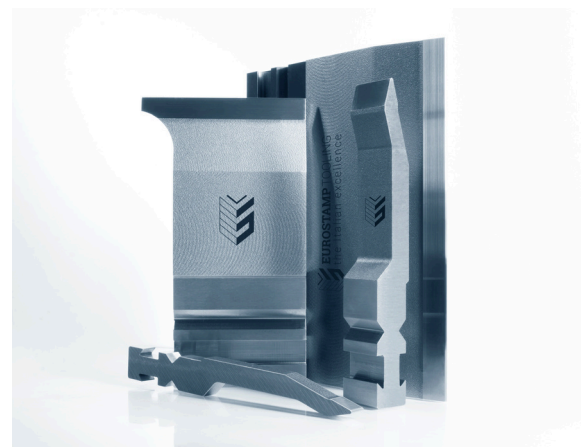

EUROSTAMP TOOLING S.R.L

Eurostamp offers a wide range of accessories for press brakes: upper and lower adapters, manual and pneumatic clamping systems, tooling extensions and tool cabinets. Solutions for press brake tools and equipment (punches, dies, radiusing elements, inserts, hemming, active bend and accessories).

Tools made with Italian special and carbon steel, hardened by induction on the parts subject to wear. This specific treatment guarantees tools with a surface hardness of 55-60 HRC, for a depth of up to 3mm.

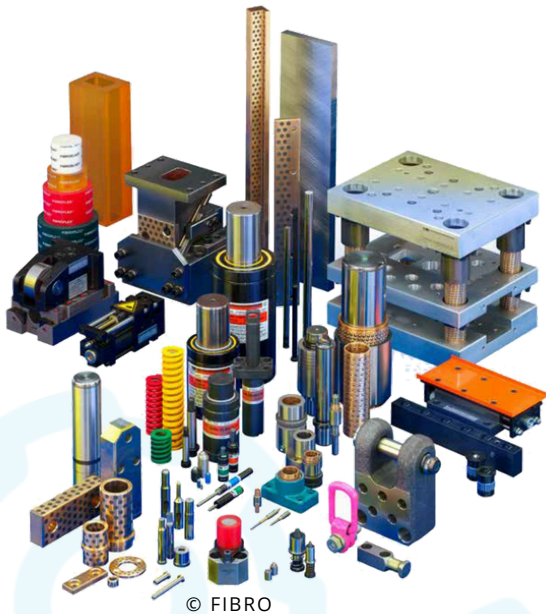

Styles for : Amada/ Promecam, Bystronic, Trumpf, ESH

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.EUROSTAMPSRL.IT

© EUROSTAMP

FIBRO GMBH

© FIBRO

FIBRO offers standard parts to various industries worldwide. Their product range includes die sets as per DIN / ISO and company standards made of steel, cast or aluminium with slide or ball guide.

FIBRO also distributes small presses, precision tool assemblies and quick change tool sets. On request, they deliver die sets with other guide elements, such as roller guides. They also manufacture individual custom-made pillar guide sets.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.FIBRO.DE

FILTERMIST INTERNATIONAL LTD

© FILTERMIST

Filtermist units are trusted by the world-leading manufacturers to protect people from harmful airborne oil mist particles. They also distribute a range of process fluid filtration consumables and coolant control equipment.

Their oil extraction systems and units help reduce energy and heating costs by recycling clean air back into the factory. Filtermist is an industry-standard from aerospace and automotive, to food processing, and medical device manufacturing. Oil mist is hazardous to health as it causes slippery floors and can cause damage to electrical switchgear and circuitry.

Units are available in mild steel and stainless steel with dozens of installation accessories to create solutions for almost any type of oil mist problem.

AVAILABLE IN: ESTONIA, LATVIA
WEBSITE: WWW.FILTERMIST.COM

PRYOR

PRYOR-EDWARD PRYOR & SON LTD.

Pryor Marking Technology manufactures the widest range of permanent marking systems available on the market. In addition, they produce data matrix readers, verifiers, and traceability solutions.

The company has grown to become a single-source supplier, offering a complete portfolio of solutions for permanent part marking. They range from a simple hand stamp all the way to turnkey, bespoke designed systems with multi-axis computer-controlled marking heads, machine vision, and traceability software.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.PRYORMARKING.COM

Hypertherm
SHAPING POSSIBILITY™

HYPERTHERM (CENTRICUT LASER CONSUMABLES)

Centricut brand is a registered trademark of Hypertherm Inc. They produce more than 3000 parts including laser optics, nozzles, nozzle holders and accessories for CO2 and fiber laser cutting systems.

With Centricut consumable for CO2 and fiber laser cutting systems, you get the same quality as OEM parts, but at a lower cost. The brand partners with world leaders in CO2 and fiber laser optics, offering a complete line of focusing lenses, including standard and low absorption coatings.

Suitable for these product lines :

Amada / BLM-Adige / Bystronic / Cincinnati / Hankwang / LVD
Mazak / Mitsubishi / NTC-Beyeler / Penta / Precitec / Prima Industrie
Salvagnini / Tanaka / Trumpf

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.HYPERTHERM.COM

© HYPERTHERM

II-VI DEUTSCHLAND GMBH

© II-VI

II-VI Deutschland manufactures and develops a wide variety of application-specific photonic and electronic materials and components, such as laser lenses and deploys them in various forms, including integration with advanced software.

The company supplies its innovative products for diversified applications in the industrial, optical communications, aerospace & defense, life sciences, semiconductor capital equipment, and consumer markets with worldwide distribution facilities.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.II-VI.COM/EUROPE

KOLVER S.R.L.

KOLVER produces electrical screw drivers for several different industries. The product line conforms to the prestigious audit authority ISO 9001:2015 Quality System Standard.

Kolver products' quality is being certified every day by an increasing number of satisfied customers all over the world who choose KOLVER screwdrivers because they are reliable and accurate, safe and pollution free, quiet and with the lowest energy consumption, innovative and powerful, ESD-safe, built to last. Kolver quality will help you stay ahead of your competition.

© KOLVER

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.KOLVER.IT

MÄDER PRESSEN GMBH

Mäder pressen is one of the leading manufacturers of hand-operated and compressed-air presses.

Manual presses provide great economy for production processes and batch sizes which require no automation. They can be used quickly and flexibly in such applications. Mäder produces two types of hand-operated presses with different force characteristics: toggle presses and rack, and pinion presses.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.MAEDERPRESSEN.DE

© MÄDER PRESSEN

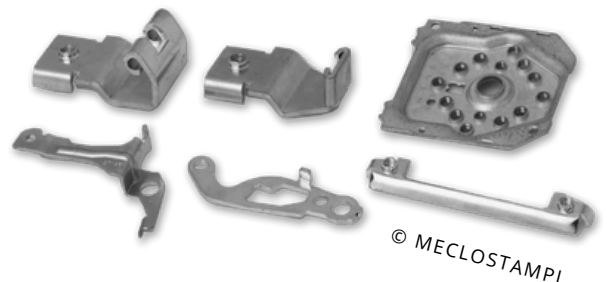

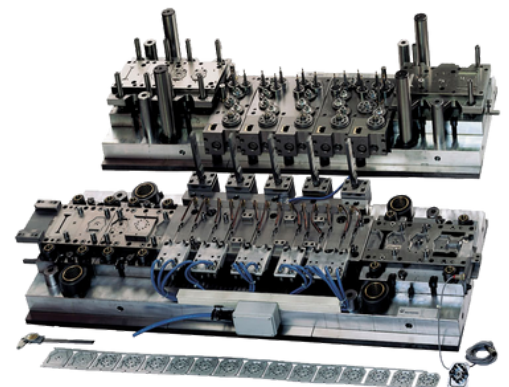

MECLOSTAMPI GROUP S.R.L.

Meclostampi Group is specialized in designing and producing steel and hard metal progressive tools for all types of sheet metal cold forming, as well as tools with incorporated threading unit (patented), compound tools transfer tools. tools to manufacture fins for heat exchangers and equipment for series productions.

Meclostampi designs and constructs high precision tools for sheet metal cold forming. They are able to manufacture tools for the medical field producing parts only a few hundredths thick (0.0038) as well as "cold forming" articles 6 mm. thick!

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.MECLOGROUP.COM

© MECLOSTAMPI

PENNENGINEERING®

© PENNENGINEERING

PennEngineering is a global leader in the fastening industry. PEM®, the company's leading brand, has been recognized as the premier product in the thin sheet fastening industry.

PEM® brand fasteners utilize self-clinching, broaching, flaring, surface mount, or weld technology to provide strong, reusable, and permanent threads and mounting points in thin sheet metal, P.C. board materials, and other ductile or non-ductile thin material.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.PEMNET.COM

HAEGER EUROPE B.V.

Haeger, a PennEngineering® Company, manufactures hardware insertion machines.

The company presents a full line of machines that provide SingleTouch Part Handling Technology. These machines allow the insertion of up to four different fasteners in a single handling of a part. This technology offers the single most significant boost to hardware insertion productivity since the introduction of automatic tooling systems.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.HAEGER.COM

© HAEGER

DEJOND FASTENING NV (TUBTARA)

Tubtara is a leading brand of high quality blind rivet nuts from the Belgian fastening specialist Dejong.

Dejong is an industrial supplier to the manufacturing industry as well as a supplier of systems for architecture and construction. They also supply products to the metalworker, and the DIY enthusiast who just needs one customized metal part. The company has become a consistent industrial supplier of non-ferrous metals, building, and fastening systems.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.DEJONDFASTENING.COM/EN/COLLECTION/TUBTARA

Stierli-Bieger

STIERLI-BIEGER AG

Stierli-Bieger AG designs and manufactures horizontal bending and straightening machines, turning devices and storage systems.

Its customer base includes the metal processing industry and well-known steel producers, machine, ship and rail manufacturers throughout the world.

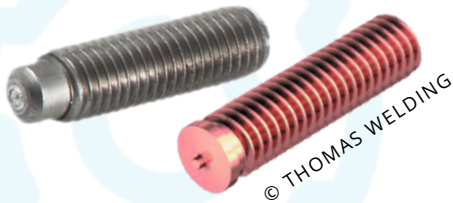

All Stierli bending machines are supplied with CE declarations of conformity.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.STIERLI-BIEGER.COM

THOMAS WELDING SYSTEMS SA

THOMAS
Welding systems

Thomas Welding's product lines cover the full range of Capacitor Discharge (CD) and ARC stud welding. The equipment line employs the latest advances in stud welding technology. Moreover, it is composed of units from light weight portable models to complete inline, computer controlled, robotic production systems, and accessories.

The standard construction fastener line consists of stud welded and non-welded insulation fasteners, refractory anchors, concrete anchors, and other specialty threaded and non-threaded construction fasteners. In addition, they offer a complete line of specialty CD and ARC industrial fasteners, and the capability for custom screw machined and cold headed components.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.THOMAS-WELDING.COM

TIMESAVERS INTERNATIONAL B.V.

TIMESAVERS

Timesavers International delivers the best deburring and wide belt grinding machines in the market.

Their machines can be used for example in deburring, edge breaking, edge rounding, heavy slag removal, precision grinding, laser oxide removal and finishing.

The machine's working width ranges from 225 up to 2600 mm and is therefore able to process several products at once. The number of products being processed per hour depends on the speed of the transport belt and brushes. The machines are engineered to work in 8 hour shifts. During these shifts every 4 hours an automatic program ensures a machine cleaning.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA
WEBSITE: WWW.TIMESAVERSINT.COM

© TIMESAVERS

ROLLERI

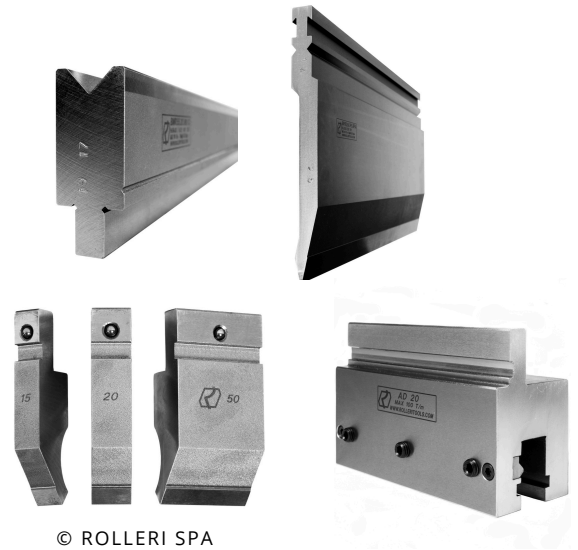

Born in 1987 as family-owned company, Rolleri SPA has become, in a few years, an important reference point for all those who deal with metal sheet bending.

Rolleri SPA, located in the province of Piacenza, produces standard and special tools for press brakes and punching machines. Like today, thanks to the collaboration of trusted partners, it's able to guarantee a coverage in each market, a fast and reliable service.

Rolleri is a leader in planning, development and production of press brake tools for the OE market and after-sales.

AVAILABLE IN: ESTONIA, LATVIA, LITHUANIA

CUMSA

INNOVATIVE SOLUTIONS
FOR YOUR MOLDS

CUMSA is a family-owned and operated company founded in 1979 by Alberto Navarra in Barcelona, Spain. Through their dedication to design, manufacturing and distribution of innovative standard solution for the mold making and molding industries, the company has grown into an internationally renowned company. Today, their headquarters lie in their hometown of Barcelona and they have four subsidiaries in Italy, Portugal, the USA and China.

CUMSA is ready to help solve any challenges designers, mold-makers and molders have to face. As a result of intensive research and development they have been able to complete a catalog of innovative solutions. Many of their products have become a reference standard in the mold making industry due to their simplicity in functionality as well as easy assembling and adjusting.

BRANDENBURGER ISOLIERTECHNIK GMBH & CO. KG

© BRANDENBURGER

Brandenburger is a global market leader for high-tech composite materials. Brandenburger's heat protection materials are used in all fields and applications with high requirements with regard to energy efficiency, process reliability, product quality and economy.

The high-quality materials ensure significant energy savings due to the considerable reduction of thermal conduction, thermal radiation and thermal convection.

Brandenburger heat protection materials are used preferably as pressure plate insulation or as exterior insulation.

AVAILABLE IN: FINLAND, SWEDEN, DENMARK, NORWAY, ESTONIA, LATVIA, LITHUANIA

BOE-THERM AS

BOE-THERM

© BOE-THERM

BOE-THERM develops and manufactures high-quality industrial temperature controls. They supply temperature control units for a variety of industries where reliability and longevity are required.

BOE-THERM offers a large program of industrial refrigeration systems. Their program consists of standard coolers up to 50 kW and customer-specific solutions up to 2,000 kW.

Every temperature control and refrigeration system that leaves the factory in Assens, Denmark undergoes a 100% final test to ensure that the machinery is flawless.

AVAILABLE IN: FINLAND, SWEDEN, DENMARK, NORWAY, ESTONIA, LATVIA, LITHUANIA

WEBSITE: WWW.BOE-THERM.COM

COVESTRO ELASTOMERS SAS

Covestro focuses on the manufacture of high-tech polymer materials and the development of innovative, sustainable solutions for products used in many areas of daily life.

Products consist of high-performance cast polyurethane raw-materials and specialty chemicals, including polycarbonates, coatings, adhesives and films. Some industries they serve are the automotive and transportation industries, as well as construction. Their materials are suitable for heavy-duty production and processes.

Covestro also has their own low pressure dispensing machines, that are built based on the customers needs. In addition, they offer a comprehensive range of machines and peripherals that enable the manufacture of cast polyurethane parts at scale.

UPC-MARATHON GMBH

UPC-MARATHON

A NITREX COMPANY

UPC-Marathon is a global leader in process control, automation, and digitalization for heat treatment and combustion. Supporting furnace OEMs and end-users, the company offers advanced solutions to boost efficiency, extend equipment life, and enhance profitability.

Its product range includes probes, analyzers, controllers, SCADA software, and turnkey systems for processes like carburizing, nitriding, and vacuum heat treatment. The QMULUS AI platform delivers actionable insights to optimize production and asset performance.

UPC-Marathon sets the industry standard with reliable, high-performance solutions for single furnaces and large-scale setups.

LAC, S.R.O.

ART OF
HEATING

@ LAC, S.R.O.

LAC Industrial Furnace Solutions designs and manufactures a wide range of industrial furnaces and heat treatment equipment, including:

- Heat treatment and foundry furnaces.
- Low-temperature dryers and laboratory furnaces.
- Ceramics and glass processing furnaces.

Tailored solutions include automatic and semi-automatic furnaces, tempering lines, and continuous furnaces, all designed in-house for precision and quality.

LAC also supply heating elements, insulating materials, and control systems, and offer furnace reconstruction and maintenance services.

Product solutions reduce costs, energy use, and emissions while meeting NADCAP and CQI-9 standards for quality and compliance.

AVAILABLE IN:

FINLAND, SWEDEN, DENMARK, NORWAY, ESTONIA, LATVIA, LITHUANIA

WEBSITE: WWW.LAC.CZ

REP INTERNATIONAL

REP international is specialized in the construction of machines for rubber injection molding. The company has an extremely broad understanding of rubber molding, along with supplying solutions for the thermoplastic, silicone paste or LSR and polymer industries.

REP injection molding presses are for example used in the automotive industry to produce anti-vibration systems and sealing applications. They are also used in fields as diverse as the pharmaceutical industry, the household equipment sector and agriculture.
